

Retail Analytics & AI-Powered Sales Forecasting System

Project Overview

Modern retail organizations collect massive amounts of sales data across multiple locations. This data holds immense potential for improving inventory management, identifying revenue opportunities, and predicting future sales trends.

In this capstone project, you will step into the role of a **Data Scientist at a national retail chain**, tasked with developing an **AI-powered analytics and forecasting system**.

By the end of this project, you will deliver a **data-driven decision-support tool** that provides business insights, predictive analytics, and an interactive dashboard for the management team.

Project Objective

Develop an end-to-end **Retail Sales Analytics and Forecasting System** that:

- Analyzes sales data from multiple stores and product categories
- Identifies key sales patterns, growth drivers, and seasonal trends
- Forecasts future revenue using time-series modeling
- Segments stores based on performance and behavior
- Presents insights through an interactive AI dashboard

Dataset Description

Dataset Name: `Retail_Sales_Data_Unlox.csv`

Data Duration: January 2023 – December 2024

Number of Records: ~73,000

Dataset:

RIVOQUIX LEARNING PRIVATE LIMITED
Hustlehub Tech Park,
Somasundarapalya Main Rd, adjacent
27th Main Road, Sector 2 hsr layout,
Karnataka 560102
